Software Engineer | Frontend-Specialist Fullstack Developer with six years of experience, specializing in **Next.js, ReactJS, Node** and **TypeScript**. Expertise in creating responsive and dynamic user interfaces. API integration. Strong foundation in Agile methodologies, version control with Git, and collaborative project management.

Professional Experience

Slalom

Software Engineer   February 2025 - Present
- Developed and maintained a custom design system repository using **Tailwind tokens and ShadCN UI components**.
- Incorporated **visual regression testing with Chromatic and Jest** to ensure UI consistency and reduce bugs across environments.
- Maintained a **private NPM package** using Rollup for reusable frontend utilities, including **Node** build scripts and **CI/CD configuration**.
- Actively participated in team meetings, offering insights and strategies for **improving frontend architecture**.

Kapital Bank

Fullstack Engineer   May 2023 - Oct 2024
- Led the frontend development of an AI-driven banking web app using **Next.js, React, and TypeScript**.
- Implemented **server-side rendering (SSR) and static generation (SSG)** in Next.js to optimize SEO and load times.
- Developed and integrated **Node.js** serverless functions for handling authentication and secure banking operations.
- Developed reusable and **responsive UI components** with Tailwind CSS, enhancing design consistency.
- Improved state management by optimizing **Redux and React Context API** for better data flow and reactivity.
- Designed and tested **middleware logic** for error handling, request validation, and token verification.
- Led code reviews and introduced performance optimizations, reducing load times and increasing Lighthouse scores.

KingTide

Frontend Engineer   April 2021 - Jan 2023
- Developed and tested frontend features ensuring high performance and accessibility.
- Testing and implementing **REST and GraphQL** endpoints on the frontend.
- Actively participated in **Agile sprint planning, ticket creation, and code reviews**.
- Translated business requirements into software solutions, enhancing client satisfaction.
- Led daily stand-ups and client meetings to align development with business needs.

Rappi

Frontend Developer   June 2019 - Oct 2020
- **Migrated monolithic codebase** into a scalable **micro frontend architecture**, improving maintainability across international teams.
- Developed and launched internal web tools used across multiple Latin American markets.
- Integrated **REST and GraphQL APIs** into React applications, ensuring seamless data communication.
- Refactored legacy code, reducing **tech debt by 30%** and improving app performance.
- Worked cross-functionally with **engineers, designers, and stakeholders** to deliver product enhancements.

Education

Ironhack Coding Bootcamp
- Fullstack Javascript Development   May 2019

Professional Training
- CSS for JS | Josh W Comeau - Egghead.io   2024
- React Performance & Advanced Patterns | KCD - Egghead.io   2023
- Desarrollo Seguro: Prevención de OWASP Top 10 | SeguInfo.ar   2020
- C1 English Certificate | UNAM Canada   2018
- Codewars | **5 kyu Rank** – Algorithm challenges & problem-solving.   Present

Skills and Interests
